

State Highway 25 between I-94 and State Highway 10 has become a vital local transportation artery supporting economic and social well-being to the region. However, transportation pressure has grown sharply recently, and anticipated continued growth will cause additional reduced capacity.

The Highway 25 Coalition was initiated to develop a unified effort among local and state interests for the purposes of joint planning and securing the funding for necessary regional transportation improvements.

HIGHWAY 25 COALITION GOALS

- Examine the impacts of continued growth in Member jurisdictions on traffic patterns.
- Conduct traffic studies defining and identifying priority improvements.
- Prepare collaborative project design and delivery recommendations.
- Study various transportation risks associated with improvement alternatives and associated timing of the construction of improvements.
- Identify and application for funding of activities via grant programs.
- Develop a unified effort among local and state interests in obtaining funding of improvements to include: (i) providing input and leadership within each Member community on matters pertaining to Corridor improvement planning and implementation; and (ii) advocacy at the State and Federal level.
- Partner with MNDOT on regional transportation decisions and involvement in regional policy decisions and discussions.
- Incorporate public input in planning efforts.
- Related and ancillary activities or common issues associated with the Highway 25 corridor
